

Explain it to me visually.

When Claude or ChatGPT hands you a wall of text, don't read it twice. Paste this prompt and get the same answer as one screen you can actually take in.

IN A HURRY? TYPE **"Explain it to me visually."**

THE FULL PROMPT • COPY AND PASTE

Explain your last answer to me visually.

I'm overwhelmed by the wall of text. Turn it into something I can understand in 30 seconds:

1. Start with one sentence: the bottom line.
2. Show the structure as one simple visual. Pick whichever fits best: a flowchart, a step-by-step map, a before/after, a comparison table, or a decision tree.
3. Use short labels, not paragraphs. No more than 8 words per box, step, or row.
4. Mark anything I need to do with "→ ACTION". Leave background info unmarked.
5. End with: "If you only remember one thing: ___"

If you can create visuals here (an artifact, canvas, or diagram), build it there. If not, draw it with plain text or a markdown table.

Rules:

- Don't add new information.
- Don't drop anything important.
- If part of your original answer was uncertain or a guess, label it "unsure".

USE IT WHEN

The answer is a process

Setup steps, a workflow, or a fix with six moving parts. You get a step map instead of a scroll.

You're choosing between options

Tools, plans, or approaches. You get a side-by-side table instead of three paragraphs of "on the other hand."

You need to explain it to someone else

Your boss, client, or team. The visual is the version you can screenshot and send.
